

New solar inverter in Brussels

Overview

How many solar installations are there in Brussels in 2023?

The energy regulator in Brussels indicates that the capital recorded 7 MW of solar installations in the first half, down from 23.6 MW for all of 2023. Analysts told pv magazine that, while the residential segment (<5 kVA) remains stable, the small and medium segment (5-100 kVA) has slowed.

How much solar energy will be deployed in Belgium in 2024?

They anticipate around 900 MW for the full year, due to growth in specific segments. Approximately 337 MW of solar energy has deployed in Belgium in the first half of 2024, according to the Becquerel Institute, a Brussels-based consultancy.

How much solar will Belgium install this year?

The Becquerel Institute forecasts that Belgium will install around 900 MW of solar this year, with 650 MW to 700 MW expected from Flanders, 15-20 MW from Brussels, and 200 MW to 250 MW from Wallonia. This would be only half of last year's record 1.8 GW, but analysts view last year's figures as "exceptional" and not indicative of ongoing trends.

Who makes reliable solar inverters?

Solar-In is a trusted manufacturer of reliable solar inverters. Our team of experts designs and crafts high-quality inverters that ensure the efficient conversion of solar energy into electricity.
