

Nickel-cadmium battery energy storage container in Cebu Philippines

Overview

The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Why should you install a battery energy storage system in the Philippines?

BESS acts as a buffer between the grid and your facility, ensuring a consistent and reliable power supply. BESS can help keep essential appliances running in areas where power outages are common. Curious to find out how much you can save installing battery energy storage systems in the Philippines?

.

What is the Philippines battery metals market?

The Philippines Battery Metals Market is an essential component of the global energy transition, supplying key metals such as nickel, cobalt, and lithium, used in the production of batteries for electric vehicles and energy storage systems. This market plays a crucial role in supporting the shift towards cleaner energy alternatives.

What is Masinloc battery energy storage?

The Masinloc Battery Energy Storage System (BESS) is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. We started our venture into battery energy storage technology in 2018 when we acquired this 10 MW system from AES Philippines.

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.
