

North Macedonia Power 2 2KWH Base Station

Overview

What changes did North Macedonia make to its energy policy?

While there were no other major energy legislative changes, North Macedonia continues to harmonize its energy sub-regulations with the EU Energy Community's Third Energy Package (TEP).

How does North Macedonia generate electricity?

North Macedonia has historically relied on hydropower for a significant portion of its electricity generation. The country has utilized its rivers to develop hydropower plants. There have been also efforts to harness wind energy, and several wind projects have been proposed or are under development.

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, solar power plants, a few biogas plants, and two wind power farms.

Who regulates the energy sector in North Macedonia?

Energy Regulatory Commission (ERC): The Energy Regulatory Commission regulates and oversees the energy sector in North Macedonia. ERC is responsible for ensuring fair competition, consumer protection, and adherence to legal and regulatory standards. 3.
