

North Macedonia solar Power Generation System

Overview

Can North Macedonia develop solar energy?

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth.

Which energy sources are used in North Macedonia?

At the moment, most of the electricity in North Macedonia is produced from thermal power plants with coal as the primary energy source. The share of the renewable energy sources in the total installed capacity in North Macedonia is 38%, with most of the renewable energy coming from large hydro powerplants.

Does North Macedonia need electricity?

Although North Macedonia's renewable energy potential is huge (especially solar), the country is still dependent on importing electricity -imported electricity constitutes around 30% of the overall gross consumption.

Is Macedonia a leader in the Western Balkans' energy transition?

RateWWW.WBENERGYWEEK.COMOV E RV I E WNorth Macedonia has accelerated its shift towards renewable energy in recent years, emerging as a regional leader in th Western Balkans' energy transition¹. By 2023, renewables accounted for 50% of the country's installed power capacity and abo
