

Oceania Folding Container High Temperature Resistant Type

Overview

What materials can withstand high temperatures?

This list features materials that can withstand high temperatures, including metals, ceramics, and polymers. Some heat-resistant options are tungsten, silicon carbide, PEEK, and more, ideal for applications in aerospace, automotive, and industrial sectors.

Is a returnable foldable large container sustainable?

One-way packaging is still widely used, and the return shipment of empty containers is costly. Using disposable packaging, however, is neither sustainable, nor very efficient. For improved space and capacity utilisation ORBIS has introduced a returnable foldable large container (FLC).

What is a returnable foldable large container (FLC)?

For improved space and capacity utilisation ORBIS has introduced a returnable foldable large container (FLC). The OceanPak plastic bin is stackable and collapsible when empty. That increases efficiency and minimizes transport costs during intercontinental shipping, especially during the return transport.

Why is a resilient coating important in ocean freight containers?

On the outside, a resilient coating protects the container from damage and weather influences at sea. Goods that are packaged in folding boxes, large containers, reusable FLCs and other plastic bins or on pallets with standard dimensions can be transported effectively in ocean freight containers.
