

Off-grid 380v inverter

Overview

What is an off-grid solar inverter?

An off-grid solar inverter is a solar inverter that works alone and cannot work with the grid. It draws energy from the battery, transforms it from DC to AC, and then outputs it as AC. In a hybrid system, the off-grid inverter can be used to create the grid.

What is an off grid hybrid inverter?

An off grid hybrid inverter allows for the coupling of utility, but, unlike the on grid hybrid, if PV solar can not supply the entire load then it supplies none (it doesn't share paralleled load like the On Grid hybrid). If you are about to embark on a PV solar system, choosing the correct inverter type is critical to your return on investment.

What is a 40kW inverter for off-grid use?

The 40kW inverter for off-grid use features high-quality pure sine wave AC output and a 3 phase 4 wire connection. It has a no battery design, a wide DC input voltage range, an LCD display, and converts DC power to AC power in solar power systems.

What is an on-grid inverter?

An on-grid inverter, also known as a grid-tie or grid-connected inverter, is generally used with an on-grid solar system. It automatically sends the excess electricity generated by the solar system into the utility grid via a bi-directional meter. The entire export/import process is known as net-metering.
