

# Off-grid solar panel prices

## Overview

---

How much does an off-grid solar system cost?

An off-grid system costs between \$45,000 and \$65,000, with an average price closer to \$55,000. Cost varies based on your system size, type, and energy needs, as well as the components you choose. How long do off-grid solar systems last?

An off-grid system can last 25 years or more with proper maintenance.

Does an off-grid solar system work with a large home?

Yes, off-grid systems work with any residential home, even larger ones. Off-grid systems work best for remote homes or those with limited access to utility power. Due to their size and power capacity, off-grid systems are more expensive than grid-tied solar systems.

What is the difference between off-grid solar and on-grid solar?

Subject to grid outages. Off-grid systems are ideal for those seeking energy autonomy or living in remote areas where the public grid is unavailable. In contrast, on-grid solar systems are better suited for homes and businesses with stable access to the grid but wanting to offset energy costs.

Are solar off-grid systems modular?

A. Yes, most solar off-grid systems are modular, allowing you to expand with additional panels, batteries, or inverters as your energy needs grow. Switching to off-grid solar systems offers energy independence, sustainability, and long-term savings.
