

Ottawa Power Energy Storage Device

Overview

Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Will a Dunrobin battery energy storage system give Ottawa Free Money?

(Credit: ASHLEY FRASER) For the majority of Ottawa's city councillors, approving the Dunrobin battery energy storage system (BESS) was a no-brainer. Battery storage makes variable wind and solar power more practical. Sounds good. Allowing the project means that the battery company will give the city free money, even better.

What is a battery energy storage system?

Battery Energy Storage Systems support the integration of flexible generation resources and provide intelligent resilience to the regional electricity grid. Ottawa BESS 2 will further support the electrification of transport and the environmental sustainability goals laid out by the plans from the City of Ottawa.

What is a lithium-ion battery energy storage system?

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.
