

# Outdoor wireless base station AP reset

## Overview

---

What does reboot & reset a wireless access point do?

Article ID:5180 Reboot and Reset the Wireless Access Point to Factory Default Settings Objective Rebooting or restarting the Wireless Access Point (WAP) deletes the logs stored in the volatile memory. This process is performed when certain changes.

How do I restore the factory settings of an AP?

You can delete the current and historical user configurations and restore the factory settings of APs. When the configuration on an AP is incorrect or deleted, you can restore the factory settings of the AP. Restoring the factory settings of an AP will reset the AP and restore all the AP configurations to factory settings.

How do I Reset my WAP to factory default settings?

There are two ways to reset the WAP to factory default settings: Step 1. Press the Reset button for more than 10 seconds until the lights go off. Step 2. Release the Reset button when the lights turn back on. Step 1. Log in to the web-based utility of your WAP and choose Administration > Reboot. Step 2. Click the Reboot To Factory Default button.

How do I Reset my unifi AP to factory default?

With UniFi APs, there are a few ways to set it back to factory default. If you already have access to the device from the software, then the first two steps will work. If not, then the last resort is to reset it on the physical device, using the reset button.
