

PACK battery factory in New York USA

Overview

What is a battery factory?

Battery factories assemble the individual battery cells into a functioning battery pack with a battery management system (BMS) and thermal management system (TMS) and enclosure. Some battery pack factories also produce cells onsite, often in a joint partnership with a cell manufacturer (like Panasonic for example).

What is a battery pack?

Battery packs are the system-level assemblies that integrate individual cells into modules and packs with the necessary electronics, cooling, and safety structures. While cells define chemistry and energy density, packs determine how effectively that energy is managed, delivered, and protected in the vehicle.
