

Papua New Guinea Stable Uninterruptible Power Supply Plant

Overview

Does Papua New Guinea have electricity?

Papua New Guinea (PNG) has one of the lowest electrification rates in the Pacific, with only 13% of the population having access to electricity. In PNG, grid-connected power is still primarily restricted to the main urban areas. Supply is often unreliable when power is available (generally in the main urban centers).

Do independent power producers contribute to power sector reform in Papua New Guinea?

1. Introduction Nepal et al. (2023), in an earlier study, studied the development and integration of independent power producers (IPPs) as one of the distinct elements of power sector reform in Papua New Guinea (PNG).

Could a Papua New Guinea 'end state' be a future?

An end state – indeed an optimistic overall outcome – could be a future where PNG's 19 mini-grids are operating through IPP arrangements, delivering a reliable and affordable power supply to businesses and everyday Papua New Guineans to alleviate the effects of energy poverty.

How can Papua New Guinea achieve a 70% electrification target?

Technical Assistance to Papua New Guinea for Implementation of the Electricity Industry Policy. Manila. World Bank in cooperation with the government, PNG's power sector requires \$1.7 billion to achieve the government's 70% electrification target by 2030. The Power Sector Development Project will support the implementation of FYPDP and NEROP. 7.
