

Paris Energy Storage Integration Project

Overview

Where is Alpiq's battery energy storage project located?

Alpiq, a Switzerland-based electricity producer, announced the acquisition of the 100 MW/200 MWh battery energy storage project located in the department of Oise, north of Paris, France from Harmony Energy, a renewable energy project developer. The project is expected to be commissioned in autumn 2026.

When will Alpiq's 100 MW battery energy storage system be commissioned?

The 100 MW battery energy storage system (BESS), with a capacity of 200 MWh, is scheduled to be commissioned in autumn 2026. This investment is in line with Alpiq's strategy of focusing on flexibility and its commitment to the integration of renewable energy and strengthening of security of supply.

What does the energy pledge mean for Europe?

At EU level, the pledge calls for: A dedicated initiative to expand electricity storage. Legislative proposals that distinguish long-duration storage from short-duration solutions. Support for the Renewable Energy Directive (RED III) and Market Design Reform. At national level, the pledge calls for:.

What is the EPRI battery energy storage roadmap?

Gaps were sorted by project set to facilitate focused, long-term research planning that incorporates projects and activities to close the gaps. This EPRI Battery Energy Storage Roadmap contains four Future State Pillars, each representing an aspect of EPRI's mission to advance safe, reliable, affordable, and clean energy.
