

# Portable energy storage device prices

## Overview

---

How much is the portable energy storage system industry worth?

The portable energy storage system industry was valued at USD 2.8 billion, USD 3.5 billion and USD 4.4 billion in 2022, 2023 and 2024 respectively. The industry is segmented in lithium-ion, lead-acid and others based on technology.

Who makes portable energy storage systems?

However, renewables generate intermittent power, making portable energy storage systems essential for energy management and grid stability. Top three players, including Chint Global Bluetti Power, and Jackery Technology GmbH account for nearly 43.5% of the portable energy storage system industry.

Which portable energy storage systems are available in Australia?

Eminent players operating in the portable energy storage system market are: In November 2024, in Australia, BLUETTI plans to introduce the AC70, AC2A, and AC200L portable power stations. With a 204Wh capacity, 300W AC output, and 600W surge, the AC2A is ideal for hikers and campers, weighing only 3.6kg.

What is a portable data storage device?

The Chief Information Officer of the GC provides this direction in accordance with the following Treasury Board Secretariat (TBS) policies: Devices that are portable and contain storage or memory into which users can store information are considered portable data storage devices. Examples of portable data storage devices include:
