

# Portable solar energy storage solution

## Overview

---

What is solar power storage?

Strictly speaking, solar power storage is not just a battery but a rechargeable solar battery. In case of strong solar radiation the generated solar energy exceeds the energy demand of the house. The excess energy is passed into the solar battery and charges it, like a battery.

What is a solar power storage solution (battery)?

Find the right storage solution for each household or business at IBC SOLAR A powerful solar power storage solution (battery) from IBC SOLAR makes more out of your photovoltaic system. This creates the conditions to have access to solar power around the clock - and not just when the sun is shining.

What storage technologies can be combined with solar PV systems?

Apart from the above four storage technologies, there are many more that can be combined with solar PV systems to store excess capacity electricity, such as thermal energy storage (TES) systems, ultra batteries and supercapacitors, to name a few.

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.
