

Portugal solar air conditioning configuration large

Overview

Does Portugal have air conditioning?

While Portugal enjoys over 300 days of sunshine a year, summers—especially in the Algarve, Lisbon, and Alentejo —can be intensely hot, and winters surprisingly damp and chilly indoors. That’s why choosing the right air conditioning system in Portugal is a crucial part of planning your home or renovation.

Which air conditioners are installed in the Algarve?

Mural (wall mounted) & Floor Mounted Air Conditioners Mural are the most common units installed in the Algarve. They are usually mounted above doors or high up on the walls and quickly become part of peripheral vision. Floor standing units are mounted on the floor like radiators and their position gives them a bias towards heating.

Why should you consider the air conditioning unit industry in Portugal?

When exploring the air conditioning unit industry in Portugal, several key considerations come into play. First, understanding the regulatory framework is crucial, as the European Union has set strict energy efficiency and environmental standards that impact product offerings and manufacturing processes.

Who is Algarve air & solar?
