

Price of a 100kW Solar Container for Australian Farms

Overview

How much does a 100kW Solar System cost in Australia?

A high-quality 100kW solar system in Australia typically starts from around A\$39,999, making it a cost-effective choice for medium to large businesses, schools, warehouses, shopping centres, or community facilities. Installation usually costs between A\$1,000 and A\$3,000, depending on your roof type, system complexity, and location.

How much does a solar farm cost in Australia?

The average capital cost of building a solar farm in Australia ranges between \$1 million and \$3 million per megawatt (MW) of installed capacity. This includes expenses for land acquisition, equipment (solar panels, inverters, and mounting systems), installation labour, and grid connection. However, several factors can influence the overall cost.

How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below – from our Commercial Solar PV Price Index – shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

Are solar farms a viable option in Australia?

As demand for sustainable energy sources increases, more investors and landowners are turning to solar energy to generate electricity, reduce emissions, and save on energy costs. With Australia's vast open spaces and consistent sunlight, the potential for solar farms is immense.
