

Price of installing solar panels at solar stations

Overview

On average, installing solar panels costs \$18,604 for a 6-kilowatt (kW) system before incentives and tax credits. How much does a solar panel installation cost?

Cost Per Kilowatt Installed Solar panel installation costs vary significantly based on location, system size, and quality. Here are 2025 average costs across major markets: Example: A typical 6 kW residential system costs between \$15,000 and \$36,000 before incentives, depending on your location and chosen components.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

How much does a residential solar system cost?

Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400. Regional pricing differences, the system size, local installation costs, inclusion of home battery backup, and local incentives are other factors which affect the final cost.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
