

Price of solar modules in the EU

Overview

How much does a solar module cost in Europe?

Search4Solar, a European platform for buying and selling solar panels, inverters, and batteries, received a record-low PV module price this week at €0.055 (\$0.058) /W. “ This is the first time the €0.06/W threshold was surpassed,” Leen Van Bellen, business development manager Europe at Search4Solar told pv magazine.

Are solar module prices at the lowest point in Europe?

Surpassing the €0.06/W threshold may indicate that solar module prices in the European market have hit their lowest point. “ This is the bottom in the EU,” Van Bellen said. “The next step could be shipping back the products to China or selling them in Africa.”.

Are solar module prices a new low?

Solar module prices reached a new low this week, says Leen van Bellen, business development manager Europe for Search4Solar, a European purchasing and selling platform for solar products. He tells pv magazine that prices will remain low in the short term.

How has the price of solar PV modules changed over the past decade?

The price of solar PV modules has decreased significantly over the past decade, with the cost of solar power falling below grid parity in many parts of Europe, thereby increasing market competitiveness, as both established and new players compete for market share.
