

Prices of solar panels in Manchester UK

Overview

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 – £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

Where can I install solar panels in Manchester?

If you've been thinking of installing solar panels in Manchester, look no further than Project Solar UK Ltd. We are your one-stop shop for solar panels for domestic and commercial properties.

How much does it cost to install solar panels?

The short answer: it depends on your home and needs. The cost of installing solar panels can range from around £4,000 to £10,000 or more, depending on the system size. Key factors include the size of your solar array (number of panels), your household's electricity usage, whether you add a battery, and even your roof characteristics.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 – £1,500 whereas polycrystalline solar panels cost about £900 per kW.
