

Purchase Guide for 25kW PV Containers in Poland

Overview

When will Poland reach a 20 gigaWatt photovoltaic capacity?

Share of renewables in the energy mix in Poland from 1965 until 2023. Poland will reach an installed photovoltaic capacity of 20 gigawatts by the end of this year.

What is the 2024 Polish auction system for renewables?

DWF's renewable energy team have prepared a guide on the 2024 Polish auction system for renewables. The guide is the result of collaboration with the Polish Photovoltaics Association, the newly established non-governmental organization aiming to support the development of large-scale solar energy in Poland as a clean energy source.

When can I use the photovoltaic discount system in Poland?

Owners of photovoltaic installations installed in Poland before March 31, 2022, can still benefit from the previous discount system. Those who installed panels after this date could use the old system until July 1, 2024.

What are Poland's goals based on photovoltaics?

The objectives established by Poland in it are to increase the share of renewable energy in gross final energy consumption and to reduce the exposure to air pollution from particulate matter (PM2.5 and PM10). Further development of photovoltaics fits in perfectly with these intentions.
