

Purchase of solar container outdoor power in Greece

Overview

Is Greece a good location for solar energy harvesting?

Greece's geographical position gifts it with an average of 250 days of sunshine per year, making it an ideal location for solar energy harvesting. This natural advantage has not gone unnoticed, as the country has seen a significant uptick in solar panel installations across both residential and commercial properties.

How long do solar panels last in Greece?

The payback period for solar panels in Greece typically ranges from 5 to 8 years, depending on factors such as system size, energy consumption patterns, and local electricity rates. After this period, the system continues to generate savings for its 25+ year lifespan.

.

What is PPC renewables doing in Greece?

- 467MW hydroelectric project with energy storage capacity of 9,646MW at northern Greece, Sfikias area, Imathia -managed and operated by PPC Renewables.
- 156MW energy storage from hydroelectric plant of 150MW at western Macedonia, Mavropigi area, Kozani - managed and operated by PPC Renewables.
