

RV 15kw industrial frequency inverter

Overview

What is a 15kW variable frequency drive inverter?

15kw variable frequency drive inverter, 20 hp 3 phase inverter with RS485 communication mode. Comes with cooling fans and IP 20 strong impact resistance, and the 3 phase variable frequency inverter works at (-10°C, 40°C). An Interior PID controller is convenient for making a closed-loop system.

What is RS485 frequency drive inverter?

15 kW (20 hp) frequency drive inverter input, voltage 3 phase 220V /380V /460V AC $\pm 15\%$ (Optional), and output voltage 3 phase AC 0~input voltage. With RS485 communication, 3 phase inverter has V/F control and sensorless vector control.

What is a 3 phase variable frequency inverter?

Comes with cooling fans and IP 20 strong impact resistance, and the 3 phase variable frequency inverter works at (-10°C, 40°C). An Interior PID controller is convenient for making a closed-loop system. It is widely applied in Industrial production lines, construction, air conditioning systems, and energy generation.

How to control a variable frequency drive inverter?

The host computer (PC/PLC) can monitor the variable frequency inverter in the control system and realize complex control functions such as remote control and fine adjustment. The remote control panel can be connected to the variable frequency drive inverter through the RS485 interface.
