What is an APC uninterruptible power supply?

An APC uninterruptible power supply (APC UPS) is a backup power source used during power failures. It delivers power to computers, peripherals, networks, servers, or data centers, allowing you to shut down the equipment properly.

What is a UPS system & how does it work?

A UPS system is a device that allows computers to continue operating when incoming power is interrupted for a short period. The energy storage is maintained and replenished as long as utility power is available. The technologies that allow UPS systems to perform differently from one another.
