

# Romania s new solar panel power plant

## Overview

---

What are Romania's large-scale solar projects?

There are several large-scale solar projects under development in Romania. CE Oltenia, a coal power supplier, plans to build eight PV plants with a combined capacity of 725 MW at several of its coal power facilities.

How much solar power does Romania have?

Solar power in Romania had an installed capacity of 1,374 megawatt (MW) as of the end of 2017. The country had in 2007 an installed capacity of 0.30 MW, which increased to 3.5 MW by the end of 2011, and to 6.5 MW by the end of 2012.

How much solar power does Romania have in 2020?

According to the latest statistics from the International Renewable Energy Agency, Romania had 1,387 MW of solar installed at the end of 2020, which is 11 MW less than the capacity it had at the end of the previous year. This content is protected by copyright and may not be reused.

Who are the top solar companies in Romania?

Romania's solar arena is moderately concentrated, with Photon Energy Group and Enel Green Power Romania anchoring the top tier, while Nofar Energy, Econergy, and NextE Renewable are expanding aggressively. International developers form local joint ventures to navigate the permitting and community engagement processes.
