

Romanian energy storage power station generator

Overview

How many mw can a Romanian power plant generate?

The ministry expects private investors to put online 1,200 MW to 1,500 MW in renewable electricity facilities financed through the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR). In addition, the mechanism will support the doubling of battery storage capacity to between 400 MWh and 500 MWh.

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Florești, Cluj county, which is expected to be operational by the end of 2025.

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.

How much power will Romania get from a hydropower plant?

Romania plans to commission the Răstolița hydropower plant, bringing 30 MW of flexible capacity, and the Năvodari cogeneration plant, of 80 MW. The said investments will add at least 2,500 MW, out of which at least 600 MW is baseload power, significantly contributing to Romania's energy security, the ministry pointed out.
