Overview

How do in-roof solar panels work?

Just like traditional solar panels, in-roof versions use photovoltaic cells to turn sunlight into electricity. The big plus?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations.

How do solar panels attach to a roof?

Solar panels can be fitted to a roof using an in-roof solution where they sit on the tile battens, are secured down, and a flashing kit is fitted around the collectors to weather-proof the roof. This method is popular for new-build projects or when a roof is being re-tiled.

What are in-roof solar panels?

In-roof solar panels, also known as integrated solar panels, are solar panels that are installed directly into the roof structure instead of being mounted on top. They replace the roofing material itself and sit flush with the roofline, providing a seamless aesthetic that traditional solar panels do not. Are in-roof solar panels as efficient?

.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:
