

Russian base station wind power supply manufacturer

Overview

Russian nuclear energy corporation Rosatom has officially launched production of wind turbine blades at its new factory in Ulyanovsk, a site previously owned by Denmark's Vestas Wind Systems A/S (CPH:VWS). Where are wind turbines made?

Located in Volgodonsk (Rostov Region, Russia) at Rosatom's power engineering centre Atomash, Rosatom Renewable Energy Plant manufactures wind turbine components and assemblies. The plant's building and cranes were retrofitted and upgraded to meet wind turbine production requirements.

How many Russian power plants are equipped with our equipment?

70% of Russian power plants are equipped with our equipment. Power is in our people. Energy in products. In 2018, Power Machines announced the development of its own technology for manufacturing gas turbines with a capacity of 65 MW and 170 MW as a part of the upgrade program for thermal power plants in Russia.

Which power units are the most powerful in Russia?

The most powerful in Russia and the world's first 3+ generation power units Novovoronezh NPP-2 and Leningrad NPP-2 are equipped with this. The Center for Hydrogen Technology is a new line of business for Power Machines, established to master technologies for storing, transporting, producing, and consuming hydrogen.

How much money does Volgodonsk wind power plant invest?

Investments in the plant infrastructure exceeded RUB 1.7 billion. The plant in Volgodonsk occupies an area of 30,000 sq m. Its annual production capacity is about 120 wind turbines per year. The staff comprises over 320 production, engineering and administrative employees.
