

# **Safe iron flow battery manufacturing in Cape Town**

## Overview

---

Where is Iron-Flow batteries based?

Developed using an advanced metal complex and membrane, Iron-Flow Batteries is based at the Paris Flow Tech platform – a premier hub for innovation in continuous flow chemistry. This state-of-the-art facility fosters the development of breakthrough technologies like ours through cutting-edge research and collaborative expertise.

What makes iron flow batteries environmentally friendly?

As iron flow batteries consist of earth-abundant and non-toxic materials, they are environmentally friendly, safe, and one of the most reliable electrochemical energy storage devices. On the other hand, an iron flow battery uses electrolytes made up of iron salts in an ionized form.

Are iron flow batteries better than Li-ion batteries?

Iron flow batteries have a longer asset life than Li-ion batteries. Battery manufacturers are collaborating with utility companies to implement iron flow battery projects, aiming to replace diesel-fueled power generation with the more environmentally friendly flow battery system.

What is an iron flow battery?

An iron flow battery uses electrolytes made up of iron salts in an ionized form. These batteries are environmentally friendly, safe, and one of the most reliable electrochemical energy storage devices due to their earth-abundant and non-toxic materials.

### [Here's the Top 10 List of Flow Battery Companies \(2025\)](#)

4 days ago · What is a flow battery made of? Who makes flow batteries? Check out our blog to learn more about our top 10 picks for flow battery companies.

## Home

2 days ago · BlueNova supplies energy storage solutions to energy industry professionals. Our collective product offering mostly consists of batteries (but also pre-configured battery ...

## ESS Iron Flow Batteries

Oct 19, 2023 · Battery chemistries matter ESS iron flow batteries offer the lowest levelized cost of storage and a safe, sustainable chemistry using simple, earth-abundant materials for the ...

## ESS IRON FLOW BATTERIES

Demand for lithium batteries for base stations  
The transition to lithium batteries in telecom base stations is accelerated by the urgent need for higher energy density and longer operational ...

## Potensa

Potensa was established in 2004, offering 65 years of combined expertise in creating customised energy solutions to a broad range of customers across Africa, the Middle East and Europe. ...

## Iron Flow Chemistry

ESS employs iron flow chemistry reducing supply chain environmental impacts and reducing the battery's lifecycle greenhouse gas footprint.

## Potensa

Potensa was established in 2004, offering 65 years of combined expertise in creating customised energy solutions to a broad ...
