

San Diego Portable Electric Energy Storage

Overview

What is the Seguro energy storage project?

By delivering stored power when it is most needed, the Seguro storage project provides flexibility that will be critical to helping the San Diego region meet its decarbonization goals and California achieve 100% carbon-free energy by 2045. AES' Seguro energy storage project is a planned facility in California.

Did San Diego County conduct a public scoping meeting for Seguro energy storage?

San Diego County conducted a public scoping meeting for the Seguro Energy Storage project. Read more here. It's important to remember that fires and thermal runaway incidents at battery storage facilities are rare occurrences.

What is AES' Seguro storage project?

AES' Seguro storage project is a proposed battery energy storage project near Escondido and San Marcos, California, that will provide a critical, cost-effective source of reliable power to support the region's electric grid.

How has energy storage technology changed over the years?

The energy storage technology being deployed today looks and operates very differently from the technology installed just three to five years ago. The industry has also developed a much deeper understanding of the technical and safety management of thermal hazards.
