

Sbs roof solar panels

Overview

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Who is SBS solar?

We are thrilled with our new 36-panel solar array installed recently by Dan Brandborg and his great team at SBS Solar. This highly skilled and experienced group was great to work with from start to finish, and we most highly recommend this company to anyone wanting to utilize clean solar energy for their home or business.

What services does SBS solar offer?

SBS Solar offers consulting, design, and installation services. See what solar installation SBS Solar has in-store for you. See what solar installation SBS Solar has in-store for you. We serve families, homeowners, businesses, public entities, and nonprofits throughout Western Montana.

Do solar panels work on metal roofs?

Depending on the type of metal roof you have, installations will differ slightly, but the big takeaway is that solar panels work well on metal roofs. If you have a standing seam metal roof, your solar installer won't have to drill holes in your roof, as panel mounts can be clamped to the raised seams.
