

Scalable Dubai Solar Containers for Wastewater Treatment Plants

Overview

What is a containerized sewage treatment plant?

Membrane Bio Reactor (MBR). Electro-coagulation. Containerized sewage treatment plants are standard containers that have STPs installed inside. It is an effective method for transporting the entire waste water treatment system from one location to another, which is particularly useful for temporary camps and construction sites.

How much sewage does a UTB plant treat a day?

UTB plant treatment volumes typically range from 3 - 200 m³ per day. The Capitox range of compact, packaged sewage treatment plants for small communities is designed to extended aeration parameters. This well proven activated sludge principle of sewage treatment is accepted as one of the most reliable methods of effluent purification.

Where can I find information about containerized STP & wastewater treatment systems?

Emvees is your go-to source for comprehensive information about Containerized STP and wastewater treatment systems. Our team is eager to discuss the possibilities and tailor the solution to your unique application requirements. Whether for purchase or rental, we have readily available units in our warehouse, ready to serve your needs.

Which sewage treatment plant is best?

Underground Trickling Bio-Filter systems are Septech's most popular sewage treatment plant. UTB's are noted for their noiseless and odour-free operation with very low power consumption. UTB's also consume a minimal amount of chemicals and generate low sludge volumes.
