

Serial number of the uninterruptible power supply

Overview

Where can I find a serial number for my uninterruptible power supply?

You will need a serial number. The serial number is usually on the nameplate sticker on the uninterruptible power supply system. This cookie is set by GDPR Cookie Consent plugin. The cookie is used to store the user consent for the cookies in the category "Analytics".

What is interruptible online power supply (UPS)?

interruptible Online Power Supply (UPS) Power ProtectionDa interruptible Online Power Supply (UPS) Power ProtectionD action for systems and data - powerful and reliable (APC SURT Gen2)UPS devices ensure high-performance power supply protection for systems and data, and thus provide reliable protection ag.

What is an uninterruptible power supply?

An Uninterruptible Power Supply is a battery backup (usually lithium-ion) which provides power to connected devices when their power source fails. Power failure can be a simple power outage or some other factor that might cause voltage to drop below the acceptable level. Some UPS devices are also designed to protect against power surges.

How long does an uninterruptible power supply run?

We know that that the Uninterruptible Power Supply can support the load demand of 270W since it's less than the Watts Power Rating of 300W. We can calculate the amperage of the load on the UPS from formula (3). $270W / 12V = 22.5A$. Therefore the UPS runtime expected would be $2.9AH / 22.5A = 0.13hrs$ or 7 minutes 44 seconds.
