

Small solar power generation system on balcony

Overview

How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!.

What is a balcony solar power station?

Balcony solar power stations, also known as mini-PV systems, are small "balcony power plants" that typically consist of a few PV modules. These modules are installed on balconies, house facades, terraces, gardens, or garages or carports, and are directly connected to a special power outlet and your apartment circuit via a micro-inverter.

What is a balcony solar power plant battery storage?

Balcony solar power stations, also known as mini-PV systems, are small "balcony power plants" that typically consist of a few PV modules.

Is balcony solar off-grid?

If you want to brag about your new "Balcony Solar" install, it's true that any device connected to the power station is "off-grid". If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!
