

Smart Solar System Retail in Eastern Europe

Overview

Which European countries have the most solar energy?

The age of solar energy is dawning in Eastern Europe: According to the European industry association SolarPower Europe, Poland has been one of the top ten leading countries in Europe in terms of PV deployment since 2016. Hungary has joined the list after adding 1.6 gigawatts (GW) of PV capacity in 2023, a 45 percent increase over the previous year.

How big is Europe's solar market?

The European solar market is experiencing unprecedented growth, with installations projected to reach 87GW annually by 2025. Driven by the REPowerEU plan and ambitious carbon neutrality targets, the continent is accelerating its transition to renewable energy.

Who is the biggest solar power company in Europe?

Data compiled from EU Solar Pulse Report 2025, BloombergNEF, and industry analyst assessments. 1. Enel Green Power (Italy) The Italian energy giant continues to dominate Europe's solar landscape with massive projects across Spain, Italy, and Greece.

Why is Eastern Europe getting more solar power?

The country's total solar power output increased dramatically, by 970 megawatts (MW) to be exact. The PV boom in Eastern Europe is driven by a desire for greater energy independence and a commitment to environmental and climate targets. Other key drivers are cost efficiency, technological advances and subsidy policies.
