

# Smart battery charging inverter

## Overview

---

What is a SMA battery inverter?

SMA battery inverters are compatible with various battery technologies and batteries from various manufacturers and are therefore highly flexible. SMA battery inverters can be integrated in existing PV systems and combined with E-charging stations or heat pumps at any time to make optimum use of the solar energy generated.

Why should you combine an inverter & battery charger in one enclosure?

Combining an inverter and battery charger in one enclosure enables many sophisticated features, such as PowerAssist and PowerControl, that are perfect for mobile, off-grid, backup and energy storage applications. All our inverter/chargers enable charging with solar & wind priority, ESS ready models enable dynamic ESS and so much more.

Why should you use an inverter and battery charger together?

Power any load problem-free. Efficiently charge EVs, convert voltages, or isolate shore power. Combining an inverter and battery charger in one enclosure enables many sophisticated features, such as PowerAssist and PowerControl, that are perfect for mobile, off-grid, backup and energy storage applications.

How does a solar inverter work?

The inverter prioritizes battery charging during low-demand periods (e.g., midday when solar production peaks). Advanced algorithms optimize charging cycles to extend battery lifespan. Charge batteries during low-rate periods (e.g., 2-6 AM). Automatically charges batteries when solar exceeds consumption. Depth of Discharge (DoD):
