

# Smart charging inverter price

## Overview

---

Portable Smart Inverters (300–2000W): \$150–\$600. Entry-level models offer basic app control; premium ones include LiFePO4 batteries and MPPT solar inputs. String Smart Inverters (3–10kW): \$800–\$2,000. Why should you buy an inverter charger?

Full System Protection: Utilizing pure sine wave technology, the inverter charger provides stable and efficient output while protecting your electronic devices. It includes multiple protections such as high/low voltage, overload, overcurrent, overtemperature, and output short circuit, making it safer to use.

What is SolarEdge one EV charger?

Available in two models – standard and Pro – SolarEdge ONE EV Charger integrates with SolarEdge inverters and SolarEdge Smart Energy Management Devices, helping customers maximize solar self-consumption and lower their electricity bills. Smart charging experience including: Automatic phase switching for optimized grid and solar use at home.

How does the inverter charger work?

LED Indicators and Cooling Fan: The inverter charger includes error LED indicators and a buzzer for real-time alarm. An internal cooling fan activates automatically when the temperature is  $>45^{\circ}\text{C}$  or the RMS value of the AC current is  $>2.5\text{A}$ , ensuring stable output performance. Would you like to tell us about a lower price?

.

How do I connect my eV to my smart charger?

3 authentication modes including FusionSolar app, RFID card, and Bluetooth enable you to flexibly connect your EV to the Smart Charger, enjoying an exclusive service. Whether it's a neighbour, friend, or someone else, you can grant your charging permission to them on FusionSolar app by account

authorization.
