

Solar AC combiner box

Overview

What is a PV AC combiner box?

The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

What is a combiner box in a photovoltaic system?

In a photovoltaic system, a combiner box acts as a central hub that consolidates and manages the direct current (DC) output of multiple solar panels. Its main purpose is to simplify the wiring structure, enhance system security and simplify maintenance procedures.

Do I need a combiner box for a solar inverter?

For solar installations with two or three strings, a solar combiner box is not required. Instead, attaching the string to the inverter might be beneficial. The use of combiner boxes is ideal for large projects with more than 4000 strings.
