

# **Solar Base Station Flow Battery Engineering Company**

## Overview

---

Where is Rongke Power completing a redox flow battery project?

The project in Ushi, China, taken from a video the company posted on LinkedIn. Image: Rongke Power via LinkedIn. Technology provider Rongke Power has completed a 175MW/700MWh vanadium redox flow battery project in China, the largest of its type in the world.

What is a giant solar-plus-vanadium redox flow battery project in Xinjiang?

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage. China has completed the main construction works on the world's largest vanadium redox flow battery (VRFB) energy storage project.

Why is a flow battery important to China's Energy Future?

It also plays an important role in regulating energy supply and frequency, making it a key component of China's sustainable energy future. Rongke Power, a pioneer in flow battery technology, previously developed the 100 MW/400 MWh Dalian system in 2022, the largest of its kind at the time.

Are flow batteries the future of energy storage?

Flow batteries, with their ability to create a more stable grid and reduce grid congestion, are considered a promising technology for energy storage. Their adoption is closely linked with the surging energy storage market and can help fill renewable energy production shortfalls.

## Solar Base Station Flow Battery Engineering Company
