What if a solar array is left blank?

If left blank, the calculator will use the daily energy consumption calculated in the previous step. This is the angle at which the solar array will be tilted (degrees from horizontal). If left blank, a default value of 45 degrees will be used. Define the Azimuth angle (degrees clockwise from true North) for the solar array's direction.

Do you need an inverter for a battery bank?

For instance, if your battery bank operates at 24 Volts, you'll require an inverter with a corresponding input voltage rating of 24 Volts. And if you live in the U.S., you'll probably require an inverter with an output voltage rating of 120 Volts.

Do I need a 120 volt inverter?

And if you live in the U.S., you'll probably require an inverter with an output voltage rating of 120 Volts. Though, in some instances, you may need a split-phase inverter capable of outputting both 120 Volts and 240 Volts to power larger appliances like central AC units and dryers.
