

Solar Micro Water Pump 3-9v

Overview

What is a 9V solar pump?

Bring your backyard to life with the exclusive AquaJet 9V Pro solar pump kit made by Silicon Solar. Combine both the power of the sun and it's integrated backup battery system designed to keep your water feature running into the evening. Adjustable flow and power settings make the AquaJet 9V a perfect match for most home projects.

What is a 3 hp solar water pump?

On grid 3 HP solar water pump is a grid tied water pumping system. In this system, the solar pump can be powered by direct solar energy as well as the government grid. If the solar panels generate more energy than the 3 HP solar pump's consumption, the excess power is exported to the grid via net metering.

What is the smallest solar water pump?

The Waterboy 4C1261100 is a mid range 4"centrifugal solar water pump. Ideally suited for small to medium water supply requirements where higher volumes of water are required. The 4C1261100 will push out up to 57,600L /day with lift of up to 25m. The 3HR200 is Waterboy's smallest solar water pump in the range, being both economical & efficient.

Who makes the AquaJet 9V pro solar pump?

Dispatched and sold by Silicon Solar. Bring your backyard to life with the exclusive AquaJet 9V Pro solar pump kit made by Silicon Solar. Combine both the power of the sun and it's integrated backup battery system designed to keep your water feature running into the evening.
