How does a solar combiner box function?

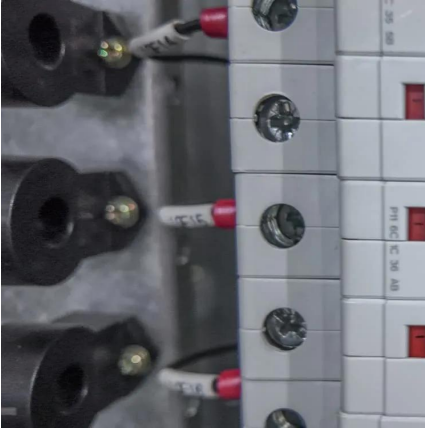

A solar combiner box binds multiple strings of photovoltaic (PV) modules into one standard bus. It connects the strings to the PV inverter. According to Northern Arizona Wind & Sun, for solar combiner boxes between 12 and 48 volts, it's a must to use breakers in place of fuses.

Do you need a solar combiner box?

A solar combiner box is unnecessary for projects with two or three strings. Instead, it would help if you connected the string to the inverter. Combiner boxes are perfect for huge projects that have over 4000 strings. Different sized boxes are used in commercial applications to procure power from abnormal building layouts.
