

# Solar container lithium battery pack power consumption

## Overview

---

Is lithium-ion battery-pack technology mature for solar home systems?

This paper explores this implementation potential by detailing the engineering aspects of lithium-ion battery-packs for solar home systems, and elaborating on the key cost factors, present and future. It is concluded that the technology is mature for the solar home system market.

Is lithium-ion battery a good choice for solar home system?

It is concluded that the technology is mature for the solar home system market. Furthermore, despite the relatively high initial cost, the lithium-ion battery is competitive at the level of energy storage cost. Ongoing cost reductions will favor the accelerated use of lithium-ion batteries in this application.

What are lithium ion batteries used for?

Lithium-ion batteries are widely used in various fields due to their high energy density and low self-discharge rate . They play an important role in everything from portable electronics to energy storage stations , and from electric vehicles to satellite .

What is the capacity of a CATL battery?

CATL serves global automotive OEMs. It is the global volume leader among Tier 1 lithium battery suppliers with plant capacity of 77 GWh (year-end 2019 data). Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 - 2.9 MWh per container to meet all levels of energy storage demands.
