

Solar curtain wall of building in Mumbai India

Overview

What is India's largest integrated vertical solar PV system?

In 2019, U-Solar Clean Energy Solutions Pvt. Ltd. installed India's largest building integrated vertical solar PV system at a data center in Mumbai. The system, with a capacity of about 1 MW, has been installed by integrating solar panels on all four walls of the facility, covering over 5000 square feet of facade area.

Can solar PV facades be used in high-rise buildings in India?

The concept can also be applied to high-rise buildings in other parts of India. The payback period for the same is also very attractive in a city like Mumbai. There is a need to include Solar PV Facades from the concept stage in high-rise buildings to ensure proper integration & minimum cost.

Is Al-Rehan India's tallest building integrated photovoltaic (BIPV) solar facade?

Al-Rehan boasts the distinction of housing India's tallest Building Integrated Photovoltaic (BIPV) Solar facade. This translates to solar panels strategically incorporated into the building's exterior, enabling the generation of clean energy on-site. The BIPV facade on Al-Rehan is not merely an aesthetic addition.

What is the difference between curtain walls and solar PV facades?

Curtain walls use aluminium or stainless steel frame & are lightweight, fitted with transparent or opaque solar panels. Solar PV Façade is aesthetically pleasing, generates electricity & helps in better energy performance of the building.
