

Solar energy system production plant in Chad

Overview

The solar photovoltaic plant at Djermaya, 30km north of N'Djamena, the capital, "will be the first utility-scale renewable energy project and will be the first privately owned, financed and managed power plant in Chad. Will a solar power plant save money in Chad?

The solar photovoltaic plant at Djermaya, 30km north of N'Djamena, the capital, "will be the first utility-scale renewable energy project and will be the first privately owned, financed and managed power plant in Chad. It will generate significant savings for the country," Pacquement explains.

Where will a solar farm be built in Chad?

Savannah Energy plans to build a 300MW solar farm and battery energy storage system (BESS) facility, called Centrale Solaire de Komé, in Komé, Chad. The clean energy generated by the facility will be delivered to Doba Oil Project, as well as the surrounding towns of Moundou and Doba, and the country's capital city, N'Djamena.

Does Chad have a solar plant?

In Chad only 1 in 20 people have electricity. But the Central African country has lots of sun. A UK company is developing the first solar plant in one of the world's poorest places. Robert Pacquement and the Djermaya Solar development team do not shy away from a challenge.

What is the Chad energy project?

The Project will help build sustainability in the electricity sector in Chad by reducing production costs; will increase installed capacity in the country and contribute 10% of the energy supplied to the interconnected system (the equivalent of 25,000 customers).
