

# **Solar energy use in St Petersburg Russia**

## Overview

---

Do solar and wind power plants produce electricity in Russia?

The volumes of electrical energy produced in the Russia by solar and wind power plants, as well as their current and prospective role in the energy balances of Russian regions are analyzed.

What is the Petersburg Solar Project?

The Petersburg Solar Project is another step in our strategy to accelerate the future of energy.

Where in Russia will a solar power plant be built?

In other parts of Russia, in particular, in the city of Narimanov, it is planned to build a solar power plant with a capacity of 25 million kWh/year. The Far East is not far behind. To meet the energy demand, a solar power plant with a capacity of 40 MW is planned to be built in the Republic of Sakha.

Do solar panels work in Russia?

In Russia, such a system does not work. However, if solar panels produce more energy than needed, it can be stored in batteries. In order to calculate the number of solar panels to supply the house, you need to find out how many kW were spent during the month.
