## Overview

---

What is solar glass?

Solar glass is a type of glass that is specially designed to harness solar energy and convert it into electricity. It is made by incorporating photovoltaic cells into the glass, allowing it to generate power from sunlight. This innovative technology has gained popularity in recent years as a sustainable and efficient way to produce clean energy.

What is Photovoltaic Glass?

Photovoltaic glass is probably the most cutting-edge new solar panel technology that promises to be a game-changer in expanding the scope of solar. These are transparent solar panels that can literally generate electricity from windows—in offices, homes, car's sunroof, or even smartphones.

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

How do solar glass panels work?

This integration not only generates electricity but also serves as functional windows, allowing natural light to pass through while still capturing solar energy. Solar glass panels work on the same principle as traditional solar panels. They are made of photovoltaic (PV) cells that convert sunlight into electricity.
