

# **Solar inverters and energy storage in the Democratic Republic of Congo**

## Overview

---

Could solar power change energy consumption in Congo?

Solar power could change energy consumption in Congo. - The Loudima family in Congo have long been without electricity but they have found an environmental solution: solar power. In the remote districts of Pointe Noire, the Congolese start-up Hélios Électricité has installed a solar power plant.

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million households, only 1.6 million have access to electricity.

Is there an interconnected national power transmission network in the DRC?

There is no interconnected national power transmission network in the DRC, which is instead structured into three independent interprovincial grids. The western and southern grids are connected by a High Voltage Direct Current (HVDC) line. The eastern grid is more remote and will not be connected.

What causes energy poverty in the DRC?

Energy poverty is attributed to factors such as cost tariffs, poor utility performance and lack of financial viability, compounded by governance issues. There is no interconnected national power transmission network in the DRC, which is instead structured into three independent interprovincial grids.
