

Solar panel manufacturers with high photoelectric conversion

Overview

Who are the top 20 global photovoltaic module manufacturers?

During the conference, PVBL announced its annual ranking of the top 20 global photovoltaic module manufacturers. In 2024, the global solar module market continued to see the strongest players thrive, with the top four enterprises — JinkoSolar, LONGi, Trina Solar and JA Solar — collectively shipping over 320GW and dominating the industry.

Which country produces the most solar panels in the world?

The Asian industry continues to dominate the global ranking of solar panel manufacturers. Chinese companies hold eight of the top ten spots, including the entire podium. Who are the top 10 photovoltaic module producers in the world?

.

What is a Topcon solar cell?

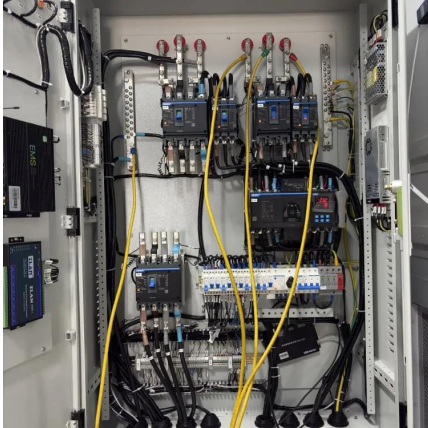

TopCON, or tunnel activated passive contact, cells are expected to make up the bulk of the market over the next five years. In addition to representing a record for HJT technology, the results are a new milestone for the photoelectric conversion efficiency of single-crystalline silicon solar cell modules, Trina said in the statement.

Who is China's top solar company?

With more than 300 GW of modules sold and a vertically integrated production line from wafers to modules, the company has ranked number one globally for five consecutive years. Trailing closely were fellow Chinese firms LONGi Green Energy and JA Solar in second and third place, respectively.
