

Solar panel roof renovation

Overview

This comprehensive guide will help you understand everything involved in getting a new roof on a house that has solar panels, from removal and reinstallation to cost considerations, contractor coordination, and how to protect your existing solar investment. How much does a solar roof replacement cost?

The cost to remove and reinstall solar panels during a roof replacement typically ranges from \$2,800 to \$4,800 for an average-sized system of 14–16 panels. Factors affecting this cost include: It also affects the timeline of the installation.

Can a solar installer replace a roof?

If your installer is no longer in business, find a licensed local solar professional who can handle disconnection and reinstallation safely. While any roofer can technically replace a roof, only some are experienced in working on homes with solar panels. Look for contractors who: Have prior experience with solar-related roofing projects.

How do you replace a solar panel on a roof?

For homeowners who already have solar panels installed but need to replace their roof, the process involves a few additional steps: Contact the solar panel installer: They will need to remove the panels and mounting hardware before roof work can begin. Coordination with the solar installer is crucial to ensure minimal downtime for the solar system.

How do I schedule a solar roof installation?

Scheduling is crucial: Remove the panels first. This step is typically handled by your solar provider. Install the new roof. Ensure your roofing contractor works quickly and efficiently. Reinstall the panels. Do this as soon as the roof is finished to avoid exposure damage to brackets and wiring.
