

Solar panels directly used as roof

Overview

What is a solar type roof?

This design not only maximizes energy efficiency but also enhances the overall aesthetic appeal of a property. Unlike traditional solar panel installations that sit on top of existing roofs, solar type roof designs incorporate solar technology directly into the roofing material itself.

Are in roof solar panels right for You?

In roof solar panels could be just the solution you're looking for if you want renewable energy without compromising the style of your home. They offer a sleek design and the same great benefits of traditional panels but do come with some trade-offs like cost and installation complexity.

What are in-roof solar panels?

In-roof solar panels, also known as integrated solar panels, are solar panels that are installed directly into the roof structure instead of being mounted on top. They replace the roofing material itself and sit flush with the roofline, providing a seamless aesthetic that traditional solar panels do not. Are in-roof solar panels as efficient?

.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:
